

CHIROPRACTIC COLLEGE OF AMERICA

This file contains the records in the Accreditation File of the California State Board of Chiropractic Examiners for this college.

This file does not list a college code; the 1992 Directory of Doctors of Chiropractic assigns a “key number of CA022.

The original records, as of 2004, are in the possession of the California State Archives at 1020 “Q” Street, Sacramento, California. 95814.

This file contains:

1. Correspondence 1933 – 1979; including a list of Board of Directors, Executive board, Faculty and Associate Faculty, dated 11 January 1938.
2. 1927 – 1928 “Third Year” Announcement of the Cale College of Chiropractic and Cale College of Naturopathy with annotations and changes to be made, probably from 1933.

August 14, 1979

Mary Ann Chance Lazare, D.C.
Executive Secretary
Australian Chiropractors' Association
P. O. Box 19
Bundoora, Vic. 3083
Australia

Dear Dr. Lazare:

The Chiropractic College of America was chartered by the State of California July 1927 as the California College of Naturopathy. Its Articles of Incorporation were amended in 1933 and the college became known as the Chiropractic College of America. In 1938 its name was again legally changed to California College of Natural Healing Arts. Its graduates were accepted for examination for licensure. This school is no longer operating as a chiropractic college as its charter was sold either in 1945 or 1946 for another professional school.

Sincerely,

Garrett F. Cuneo
Executive Secretary

GFC:sr

AUSTRALIAN CHIROPRACTORS' ASSOCIATION
FEDERAL EXECUTIVE HEADQUARTERS

All replies to: P.O. Box 19, Bundoora, Vic. 3083

July 30, 1979

Mr. Garrett F. Cuneo, Executive Secretary
STATE BOARD OF CHIROPRACTIC EXAMINERS
921 - 11th Street,
Suite 601,
SACRAMENTO, CALIFORNIA
U.S.A. 95814.

Dear Mr. Cuneo,

We have recently received a query from one of our state branches concerning the validity of the attached diploma, which has been submitted in support of application for membership in this Association. In order for us to advise the Branch, it would be necessary to know:

- (a) whether a diploma from the "Chiropractic College of America" is, or ever has been, recognized by the Board for the purpose of licensure,
- (b) if so, under what circumstances, including relevant dates, and
- (c) whether this diploma appears to be genuine.

We look forward to your early reply.

Very truly yours,

Mary Ann Chance Lazare, D.C.
Executive Secretary

Texas Board of Chiropractic Examiners
Littlefield Bldg.
Austin, Texas

Re: Dr. Thomas L. Phillips, D.C. -
Graduate Chiropractic College of
America.

Dear Mr. Bauknight:

We have been asked by Dr. Thomas L. Phillips of Yaleta, Texas, to advise you regarding the status of the Chiropractic College of America. The Chiropractic College of America was chartered by the State of California July 1927 as the California College of Naturopathy. Its Articles of Incorporation were amended in 1933 and the college became known as the Chiropractic College of America. In 1938 its name was again legally changed to California College of Natural Healing Arts. This school while operated by Dr. H. M. Testael, D.C., as President, was a very fine college. Its graduates were accepted for examination for licensure and made an especially high general average. This school is no longer operating as a chiropractic college as its charter was sold either in 1945 or '46 for another professional school.

We have at this time in the process of being printed, a chiropractic state directory and when the same is ready for distribution, which we hope will be about the 1st of February, we will send you a copy of same.

Very truly yours,

WILLARD W. PERCY, D.C.,
Secretary

ME/km

I, Mildred F. Engelke, Assistant Secretary of the State Board of Chiropractic Examiners, hereby certify that the above is a true copy of a letter written on December 16, 1949, by our former Secretary, Willard W. Percy, D.C.

Assistant Secretary

DATED: July 20, 1956
Sacramento, California.

Dear Doctor - Signed by J. L. Phillips

March 22/33

Dr. H. M. Letzel,
307 So. Hill St.,
Los Angeles, Calif.,

Dear Dr. Letzel;

Your letter of March 17th received.

You say that it is the practice of chiropractic that is bringing upon us the threat of Basic Science? I will agree that there is a real threat of BS, at this very time but it is not the practice or the practitioner that is now in the field but it is our low educational standard and the general unregulated chiropractic school condition that we have what is our trouble, for we can not well defend our present position before the public.

Your suggestion for the colleges to form a united front and voluntarily raise their standards is all very well, but the Council of Chiropractic Examining Boards of the U.S. and Canada, of which I have been Secretary for the past four years, has been working on the school grading, and standardizing of the course set for the past four years, and only three schools out of twelve in Calif., offered any cooperation whatever, and one promptly and bluntly told us to go to -----. Rutledge, Carver and Palmer are all against any raise in standards, and Rutledge says it is too high now. So I'm afraid as far as any dream of getting schools together, we may as well turn over and go back to sleep.

The State Board, at least so far as my experience has gone, always has and still does recognize entrance into the University, as equivalent to High School credentials. As to parallel subjects, they may be credited, and are credited, but the University does not teach 60 minute hours, they are not measured that way, however most subjects are of 50 minute periods.

You mention a case you say is in point, and the student has 468 60 minute hours in biology, and my office failed to give him credit for same. wherein does the Act require biology

This Board has no authority to classify or reclassify subjects, we can credit chemistry, but pharmacy not at all. You and perhaps most schools would not challenge us upon that, but there are others just waiting for the chance. We think we know what biology is, and like wise we think we know what chiropractic is but we cannot prove it by the Act.

There are no chiropractors in the State that are more happy to young men high school graduates and those with at least two years of college come into our profession, than are the members of this Board, and that is the reason we always have been and are now strong for amending the Act. The Board can not amend

the Act, that is up to the profession, as you know.

I am informed that the state Assn., has at this time about perfected an amendment to the Act, which will raise the standard and correct many other defects and if this amendment will correct just a few of the fatal deficiencies of the Act I strongly urge every chiropractor to support it to the limit.

I hope the profession will become aroused and become united and do something about these things, but I some times think it will take a major calamity to obtain unity. Without unity we will accomplish very little if anything.

Yours Sincerely,

A handwritten signature, possibly reading "C. H. H.", written in dark ink.

LOS ANGELES, CALIFORNIA

March 17, 1938

18-
C. J. Hunt, D.C., Secretary
State Board of Chiropractic Examiners
Sacramento, California

Dear Sir:

The situation here in California in regard to the practice of Chiropractic is rapidly bringing to the front the threat of Basic Science legislation.

It is our suggestion that we may forestall this move if the Chiropractic Colleges in this State form a united policy of demanding that prospective students have two years of pre-requisite study in Junior Colleges or Universities in subjects parallel to the standard pre-medical requirements.

Of course, our law, as it stands, confines us to "High School or its equivalent," but the Chiropractic curriculum could be handled in a manner that would easily dispose of applicants who would demand that their High School credentials be honored.

On the other hand, to make the two years of College effective and to attract students with pre-medical credits (of whom 25% only find room in Medical schools) it would be necessary that the State Board of Chiropractic Examiners recognize these pre-medical requisites in so far as they parallel the present legal Chiropractic requirements. That is to say, if University sixty-minute hours in Chemistry, Bacteriology, Histology, Embryology, Physiology, and Pathology are recognized on an equable basis and then credited toward equivalent hours in the Chiropractic curriculum. (This, if for no other reason, would permit much more adequate instruction by our colleges in the major Chiropractic subjects.)

As a case in point, we cite the credits allotted by your office from the transcript of Joseph J. Springer. This student holds a Bachelor of Science Degree from Loyola University (Chicago), having a "major" in Biology of twenty-six semester hours (468 physical sixty-minute hours), and a "minor" in Chemistry of twenty-eight semester hours (504 physical sixty-minute hours) computed over the full four academic years of study. This is a total of 972 actual hours that parallel and then go far beyond

the elementary requirements of the subjects as taught in Chiropractic Colleges. However, your office has evaluated these 972 hours at only 38 hours total on this student's credit for Chiropractic.

If our Colleges were to institute immediately this increase of prerequisite standards, we could not make it effective or desirable if pre-Chiropractic University credits were to be discounted at the rate of 1 to 25, as in this case.

We understand fully that this matter of increased prerequisite standing must come from the profession and its Colleges, not from the State Board. However, we solicit your favor within the law in the appraisal and award of credits, if we are to effectively put into motion a proposal which may save Chiropractic from an insurmountable handicap.

LOS ANGELES, CALIFORNIA

January 11, 1938

Dr. C. O. Hunt, *Secretary*
State Board of Chiropractic Examiners
State of California
Sacramento, California

Dear Sir:

As the successor to Dr. Curtis Hollinger in the presidency of the Chiropractic College of America, it is my pleasure to acknowledge your letter of November 24, 1937 and to present greetings to the Members of the Board of Chiropractic Examiners from the new Board of Management and the proprietors of this college.

You will be interested to know that a group of Doctors of Chiropractic together with several persons of academic (University) standing, have assumed ownership and management of this institution, and that they are personally accepting the educational and clinical duties essential to the production of efficient practitioners in our profession. Several of these doctors have been on the faculties of other colleges and our non-professional members are graduates in the Arts and Sciences, State-accredited teachers in subjects pertinent to the Chiropractic course.

Replying to that part of your letter dealing with educational policies--- we are thoroughly in accord with any principles which shall improve the academic and professional standards of aspirants to California licenture. It will be our constant aim to prepare applicants fittingly and present to you only those who have proven their worth. To this end, we shall insist upon scholastic standards that will meet successfully the most critical scrutiny. Written examinations will be the rule, not only for graduation but also for presence in our classes from semester to semester. Passing grades of 75% shall be required in academic work before students may be eligible for clinical experience.

The members of the faculty of this college are perfectly in accord as to the standard our graduates shall carry into the field, and

we are pledged to maintain that standard even in the face of economic pressure. As rapidly as it is possible we shall expand our educational and clinical facilities so that we may present to Chiropractic in California not "just another college", but an institution which may well be a credit to the most exacting professions.

We assure you of our desire to cooperate with our State Board and of our readiness to consider any suggestions for the advancement of Chiropractic.

Yours very truly,

HMT/rm

CH-

July 15, 1933

Dr, Curtis Hollinger, D.C.,
Secretary-Treasurer
Chiropractic College of America,
150 South Hill St.,
Los Angeles, Cal.

Dear Doctor:

This is to acknowledge receipt of your two letters of July 15th, in one of which you inquire relative to credits for a student who is a graduate of the Naprapath College, and the other, regarding the recognition of the Chiropractic College of America by this Board.

The information regarding the change of name of the Dale College to the name of Chiropractic College of America, and also your request for recognition, and offer of cooperation with this Board, is appreciated. Regarding the recognition by this Board of Examiners, there is practically no formality. The only requirement, however, is that it be a chartered institution, and teach the subjects and hours set forth in the California Chiropractic Act, and as long as these requirements are complied with, your institution will have equal recognition with all other institutions.

As to the policy of the Board, first we believe that the High School status of the student should be established upon his matriculation with the College, and he should either present to the College evidence of his High School diploma, or a Validation Certificate, to establish the fact that he has the equivalent, as required by the Act.- Regarding the credits from other institutions, in which the students requests these credits to be applied upon his chiropractic course, it is the policy of the Board to grant such credits from recognized and legally chartered institutions, such as, for instance, State Universities, or endowed institutions, and legally chartered chiropractic schools or colleges. In the case of this Smith College of Naprapathy, this Board has no means by which it may establish the standing of this institution, and further, Naprapathy is not a recognized method or mode of treating the sick and afflicted human beings within the

State of California. Therefore, this Board believes that we are not justified in granting credits from such an institution.

Under separate cover, I have forwarded to you copies of the Act, and Application blanks, per your request.

Thanking you again, I am

Very respectfully yours,

CC: [illegible]

Chiropractic is Successful

Chiropractic is the most successful method of curing disease and it has also now become the most popular. Millions of people in the United States now depend upon Chiropractic to keep them well and the number is increasing every day.

The ~~Cale College of Chiropractic~~ keeps Chiropractic first in all its classes and all its clinic work. People must have Chiropractic adjustments in order to get well and stay well. Nothing can ever take the place of accurate and specific chiropractic adjustments in the cure of disease. Dr. Cale was himself cured by Chiropractic adjustments after he was seemingly fatally ill of liver and stomach trouble.

Students in the ~~Cale College of Chiropractic~~ are early taught to palpate and adjust as skill in palpating and adjusting is the principal object to be attained in the entire course of study. Each student is required to give 900 adjustments before graduating. This large number of required adjustments insures skill and accuracy in the work. Many students give many more than the required number of adjustments.

We give a thorough course in Anatomy, Physiology, Pathology, Embryology, Histology, Dermatology, Elementary Chemistry and Toxicology, Bacteriology, Diagnosis, Chiropractic Theory and Practice, Hygiene and Sanitation, Obstetrics, Gynecology, Urinalysis, and X-ray. Our graduates are expected to make the highest marks on the State Board examinations.

Length of Course

The ~~Cale College of Chiropractic~~ teaches all the subjects and hours required by the California Chiropractic Law. The law requires that the course cover at least 2400 hours and occupy at least eighteen months. By attending seven hours a day, five days a week, the student can complete the 2400 hours in eighteen months, which conforms with the law. The day classes begin at 8:45 and close at 4:15, five days a week. This includes the recitation period for the Naturopathic subject which is given daily. We have lengthened our course to twenty months, which is two months more than required by law.

Subjects Taught

The California State Chiropractic Law requirements are as follows:

Anatomy	600 hours
Histology	100 hours
Elementary Chemistry and Toxicology	100 hours
Physiology	200 hours

Bacteriology	100 hours
Hygiene and Sanitation.....	100 hours
Pathology	200 hours
Diagnosis and Analysis	400 hours
Chiropractic Theory and Practice	500 hours
Obstetrics and Gynecology	100 hours
Total	2400 hours
Our Additional Hours	400 hours
Grand Total	2800 hours

Teaching Experience

Dr. Charles A. Cale, the president of the ~~Cale College of Chiropractic and the Cale College of Naturopathy~~, began teaching in the public schools at the age of 17. He is a graduate of the Warren, Indiana, High School and the Terre Haute, Indiana State Normal School.

Dr. Cale took his first course in Chiropractic in Dr. Storey's Chiropractic School in Los Angeles and took a review course in the Palmer School of Chiropractic at Davenport, Iowa.

Dr. Cale attended the College of Osteopathic Physicians and Surgeons in Los Angeles two years and a half.

Dr. Cale started the Los Angeles College of Chiropractic in 1910, with one student, Dr. Fred Sargent. He conducted that school until 1922, when he sold it.

In February, 1925, Dr. Cale and four other Chiropractors organized the Cale College of Chiropractic and the Cale College of Naturopathy.

Tuition Fee

We are now giving our regular \$800 course for \$500, payable \$15 per month. If paid in advance, the tuition is only \$400 at present. Persons, who would prefer to pay after they graduate, may give us a note for \$600 payable after graduation. These tuition prices are subject to change at any time, and if you wish to get these reductions, you had better take advantage of the offer at once. Other schools, which do not give nearly as thorough a course as ours, are charging much more for tuition. ~~There~~ is no extra charge at present for the lessons in the Naturopathic subjects.

Earn Your Way

In a city of the size of Los Angeles, with more than a million population, there are many opportunities of earning your way through school. You can attend our school morn-

ings and afternoons and have the evenings off. Or you can attend mornings and evenings and have the afternoon off.

Occasionally we can provide work about the College whereby ambitious young men and young women can earn their tuition, or at least part of it.

Legal Recognition

The voters of the State of California gave legal sanction to the practice of Chiropractic by giving a majority of 152,000 for the Chiropractic Law at the 1922 election. Other states, which have legalized Chiropractic, are Arizona, Arkansas, Connecticut, Florida, Georgia, Idaho, Iowa, Kansas, Maryland, Minnesota, Montana, Nevada, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, Oklahoma, South Dakota, Utah, Vermont and Washington. Also Hawaii and Japan. All the other States will have legal recognition in due time.

Visitors

We invite you to visit our school. We will be glad to have you attend all the classes for a day or even more.

Credits

Credits will be given to the student presenting credentials from other Chiropractic schools which give standard courses.

Demand for Chiropractors

Chiropractic has now become the most popular method of treatment, and it will continue to grow in popularity as time goes on. People can no longer be fooled by drugs and serums. People want the cause of disease removed, and that is what we do. To be sure, there are 150,000 M. D.'s and only about 20,000 Chiropractors, but the time is coming when these figures will be reversed.

Living Accommodations

Our College occupies a large ~~24 room~~ building not far from the ~~West-Seventh Street~~ business center. ~~By special arrangement a few students can be given living accommodations in the College building.~~ The College is easily reached by three yellow car lines.

Naturopathic Subjects

Many students want lessons in Massage, Dietetics, Electrotherapy, Hydrotherapy, Spondylotherapy and Suggestive Thera-

peutics. To meet this demand, we give courses in these subjects outside of the regular Chiropractic College hours. There is no extra charge for the courses in these Naturopathic subjects. We advise all students to take these Naturopathic subjects, even if they do not care to practice them, for they add to our general fund of information about the healing art and enable us to answer people's questions more intelligently about natural methods of treatment. There is no virtue in ignorance. Chiropractors should know as nearly as possible everything about all methods of treatment.

Chiropractic is head and shoulders above all other methods of treatment, and no Chiropractor need ever be afraid that some other Naturopathic method of treatment will ever take the place which Chiropractic now holds at the top.

We teach how to prescribe a proper diet, and yet a proper diet will not correct the troubles which are caused by a subluxated vertebra.

We teach how to give a scientific Massage, and yet one Chiropractic adjustment is worth twenty massages when it comes to curing disease.

We teach Eletrotherapy, and electrotherapy, no doubt, occasionally supplies a helpful stimulation to the body, but it will not remove the cause of disease.

We teach Hydrotherapy, and hydrotherapy with its baths has a useful place in many instances, but it will not straighten a crooked vertebra.

We teach Spondylotherapy and spondylotherapy will, no doubt, produce a temporary beneficial effect, but restoring subluxated vertebra, to its proper position, produces a permanent effect.

We teach Suggestive Therapeutics, and suggestive therapeutics has often changed a despondent frame of mind into a hopeful attitude, but it requires a course of Chiropractic adjustments to restore misplaced vertebrae so that the body and mind can function normally.

Diplomas and Degrees

All students, who take the required 2800 hours in the Chiropractic course, are given the degree of Doctor of Chiropractic, D. C.

All students, who take the required 2800 hours in the Chiropractic course and in addition take the 200 hours in the Naturopathic subjects, are given the degree of Doctor of Naturopathy, N. D.

All students, who put in 3200 hours, are given the degree of Philosopher of Chiropractic, Ph. C.

All students, who put in 4000 hours, are given the degree of Master of Chiropractic, M. C.

Naturopathic College

The ~~Cale College of Naturopathy~~ is conducted by the same faculty as the ~~Cale College of Chiropractic~~. The course in the ~~Cale College of Naturopathy~~ includes all of the 2800 hours which are required in the ~~Cale College of Chiropractic~~, and in addition the 200 hours of other Naturopathic subjects, including Dietetics, Massage, Electrotherapy, Hydrotherapy, Spondylotherapy and Suggestive Therapeutics. This makes a total of 3000 hours that we teach in the ~~Naturopathic College~~. As the Medical Board requires only 2000 hours for a ~~Drugless License~~, they might sometime approve our ~~Naturopathic College~~.

Enroll Any Time

Our course is so arranged that you can enter at any time without missing any of the work. The sooner you begin, the sooner you complete the course and receive your diploma. Do not delay.

Text Books

We request each student to provide a last edition of Gray's Anatomy, which has been a standard for almost a century. Also a text-book on the Philosophy of Chiropractic. But most of the other subjects are taught by the lecture and quiz methods, and the text-books are not so essential.

Evening Classes

We give a thorough course in our evening classes. In the evening the recitations begin at 6:05 and close at 9:45. The evening class puts in three and a half hours in the Chiropractic course each evening, thereby getting in a full half day's credit. By attending only the evening class the entire course can be completed in forty months. Besides these three and a half hours in the evening class, we also give an additional lesson period each evening in a subject in the Naturopathic course.

Our Clinic

Hundreds of patients are treated annually at the ~~Cale College of Chiropractic~~. Many of these patients are treated free. A small fee is charged for the treatments given by the most advanced students. In some cases we make X-rays, urinalysis and blood tests. These clinic treatments are given any time from 9 a. m. to 9 p. m.

7

*Required for enrollment—
High school diploma or a
certificate from a Validating
Board of Chiropractic Board*

Discipline

The faculty of the school expect the students to conduct themselves in a courteous manner at all times. Should a student's opinion differ from that of the teacher or the textbook, the student is requested to take the matter up with the president of the College and not take up the time of the class in presenting personal opinions. Smoking is not allowed in the building or on the premises.

Postgraduate Courses

Chiropractic America
The ~~College~~ College of Chiropractic gives a Postgraduate course for Chiropractors who already hold a diploma.

We all know how quickly we get rusty on our Anatomy, Physiology, Pathology, Gynecology, Obstetrics, Chemistry, Histology, Bacteriology, Hygiene, Sanitation, Dietetics, Electrotherapy and X-ray.

Our Postgraduate course is for the purpose of refreshing your knowledge in these subjects, and of adding the newer information as it is discovered from time to time.

Our Postgraduate course will keep you up to date and make you able to converse intelligently on all the new discoveries in the various subjects which every Chiropractor is expected to be well posted on.

Postgraduate Degrees

To get our degree of Philosopher of Chiropractic, Ph. C., the requirement is a total of 3200 hours of fifty minutes each. If you already have 2400 hours, you would need 800 more hours to complete the 3200 hours. In case you already have 2600 hours, you would only need 600 more hours to get your Ph. C. degree. In case you already have 2800 hours, you would only need 400 more hours to get your Ph. C. degree.

To get the degree of Master of Chiropractic, M. C., you are required to have a total of 4000 hours of fifty minutes each. In case you already have 3200 hours, you would need to have 800 more hours to make the 4000 hours to entitle you to the degree of Master of Chiropractic. In case you already have 3400 hours, you would need to have 600 more hours to make the required 4000 hours to entitle you to the degree of M. C. In case you already have 3500 hours, or 3600 hours, or 3800 hours, you can easily figure out for yourself the length of time it would take to get the M. C. degree.

Persons who already have the three degrees of D. C., Ph. C., and M. C., may take one of our Postgraduate courses and receive a diploma marked "Postgraduate."

Who Should Attend?

All Chiropractors, who have been out of school for a few years, should attend our Postgraduate course. The course is systematically arranged so as to cover all the Chiropractic and Naturopathic subjects in a regular manner.

Your patients will think more of you if they know that you are progressive enough to go ahead taking a systematic Postgraduate course. Remember, that if you do not advance, you go backward. You Chiropractors, who are in the field, are the ones who meet the public. If you are constantly studying and advancing in knowledge, the standing of Chiropractic, in the estimation of the public, is raised. If you are slipping backward and falling behind in the newer knowledge, then the standing of Chiropractic, in the estimation of the public, is lowered. The public judges Chiropractic by you. Come in with us and keep yourself abreast of the times.

Postgraduate Tuition

The tuition for our Postgraduate course is only twenty-five dollars per month. Anyone can afford to take our Postgraduate course at that small price. No text-books are necessary. You cannot afford to miss this opportunity. You want to be up-to-date. We are making it easy for you to do so. We will go quite thoroughly into the difficult subjects, such as the Sympathetic Nervous System and the Lymphatic Circulation. You can begin this Postgraduate course any time. The degrees of Philosopher of Chiropractic and Master of Chiropractic will be issued as soon as you have put in the required number of hours.

Postgraduates in Regular Class

Chiropractors, who can spare five evenings a week, can get the degree of Philosopher of Chiropractic and the degree of Master of Chiropractic in a shorter time by attending our regular classes five nights a week. By attending five nights a week you can get in twenty hours a week and can, therefore, get in 800 hours in forty weeks, and thus receive the degree Philosopher of Chiropractic, and then in another forty weeks get the degree of Master of Chiropractic. We go into all the subjects so much more thoroughly than most Chiropractic schools, that if you have been out of school a few years you will find it exceedingly interesting and valuable to take your Postgraduate course in the regular evening classes. The tuition for the regular evening classes is fifteen dollars per month.

1933-1934

~~Calendar—1927-1928~~

Winter Term ends	Friday, May 6, 1927
Summer term begins	Monday, May 9, 1927
Summer Term ends	Friday, October 7, 1927
Winter Term begins	Monday, October 10, 1927
Winter Term ends	Friday, March 2, 1928
Summer Term begins	Monday, March 5, 1928
Summer Term ends	Friday, August 3, 1928
Fall Term begins	Monday, August 6, 1928
Fall Term ends	Friday, December 21, 1928
Winter Term begins	Monday, December 31, 1928

Special Features

1. Our tuition fee is as low as it is possible to make it and still give a thorough course.
2. Day and evening classes.
3. School twelve hours a day. You attend as many hours as you are able. *not exceeded in chiropractic*
4. Great abundance of clinic patients.
5. We teach pure, straight, unadulterated, unalloyed Chiropractic. No one is urged to mix anything with Chiropractic.
6. We insist that all Chiropractors have a just right to all the knowledge that anyone else has about the human body and the methods of combating the diseases of the human body. We, therefore, have classes in all drugless methods. These classes in drugless methods are elective, and students are free to take that work or let it alone. There is no extra charge for these classes. A separate diploma is given to those who take the extra drugless classes.
7. We conduct a Postgraduate course to enable Chiropractors to receive additional degrees and to keep abreast of the times in all new information as it is made public.

8. ~~We conduct a special University Extension course for Chiropractors which is very valuable to all Chiropractors. Tuition, \$4.50 per month.~~

Our Christmas Present

(The students of the ~~Cale~~ College of Chiropractic presented to Dr. Charles A. Cale, president of the College, a handsomely engrossed parchment signed by all the students as a Christmas surprise. It was as follows:)

We, the students of the Cale Chiropractic College, appreciate your untiring energy and scholarly ability in giving us the best and most practical course of Chiropractic in the United States, and extend to you our best wishes for a Merry Christmas and a Happy New Year.

May Cale Chiropractic College ever stand as a monument to your faithful and valuable services.

Los Angeles, Calif.

Dec. 25, 1925.

Special Announcement

~~When Dr. Charles A. Cale sold the Los Angeles College of Chiropractic he accepted back, as part of the sale price, twenty-five scholarships in that college. Dr. Cale now offers those scholarships for sale for \$400 cash or \$500 in installments.~~

PROGRAM OF CLASSES *Chiropractic College of America* *Gale College of Chiropractic and Gale College of Naturopathy*

~~SUMMER TERM—MAY 9, 1927, TO OCTOBER 7, 1927—20 WEEKS~~

FORENOON CLASS

8:45—Electrotherapy
 9:00—Anatomy of Viscera
 10:00—Obstetrics (First)
 11:00—Pathology (Special)
 12:00—Philosophy of Chiropractic

AFTERNOON CLASS

12:00—Philosophy of Chiropractic
 1:15—Anatomy of Circulation
 2:15—Infectious Diseases
 3:15—Hygiene and Sanitation
 4:15—Dietetics

EVENING CLASS

6:05—Philosophy of Chiropractic
 6:45—Anatomy of Circulation
 7:45—Infectious Diseases
 8:45—Hygiene and Sanitation
 9:45—Dietetics

~~WINTER TERM—OCTOBER 10, 1927 TO MARCH 2, 1928—20 WEEKS~~

FORENOON CLASS

8:45—Electrotherapy
 9:00—Dermatology and Syphilis
 10:00—Eye, Ear, Nose and Throat
 11:00—Embryology
 12:00—Philosophy of Chiropractic

AFTERNOON CLASS

12:00—Philosophy of Chiropractic
 1:15—Physiology of Respiration and Circulation
 2:15—Genito-Urinary Disease
 3:15—Obstetrics (Second)
 4:15—Dietetics

EVENING CLASS

6:05—Philosophy of Chiropractic
 6:45—Physiology of Respiration and Circulation
 7:45—Genito-Urinary Diseases
 8:45—Obstetrics (Second)
 9:45—Dietetics

~~SUMMER TERM—MARCH 5, 1928, TO AUGUST 3, 1928—20 WEEKS~~

FORENOON CLASS

8:45—Suggestive Therapeutics
 9:00—Anatomy—Osteology
 10:00—Chemistry and Toxicology
 11:00—Histology
 12:00—Philosophy of Chiropractic

AFTERNOON CLASS

12:00—Philosophy of Chiropractic
 1:15—Anatomy—Brain and Spinal Cord
 2:15—Gynecology
 3:15—Pathology (General)
 4:15—Hydrotherapy

EVENING CLASS

6:05—Philosophy of Chiropractic
 6:45—Anatomy—Brain and Spinal Cord
 7:45—Gynecology
 8:45—Pathology (General)
 9:45—Hydrotherapy

~~FALL TERM—AUGUST 6, 1928, TO DECEMBER 21, 1928—20 WEEKS~~

FORENOON CLASS

8:45—Massage and Spondylotherapy
 9:00—Anatomy—Muscles
 10:00—Bacteriology
 11:00—Physical Diagnosis
 12:00—Philosophy of Chiropractic

AFTERNOON CLASS

12:00—Philosophy of Chiropractic
 1:15—Anatomy—Nerves
 2:15—Nervous Diseases
 3:15—Physiology Nerves—Digestion
 4:15—Hydrotherapy

EVENING CLASS

6:05—Philosophy of Chiropractic
 6:45—Anatomy—Nerves
 7:45—Nervous Diseases
 8:45—Physiology—Nerves—Digestion
 9:45—Hydrotherapy
